Profile

Full Stack Developer with 3+ years of experience specializing in building and deploying high-traffic web applications using the MERN stack on AWS. Demonstrated success in improving operational efficiency by 40% through automation and delivering user-centric platforms in insurance and real estate domains. Passionate about architecting scalable systems and leveraging modern DevOps practices.

Professional Experience

Full Stack Developer | Hexadecimal Software Pvt Ltd, Noida | July 2023 – Present

- Engineered and launched [HexaHome](#), a property e-commerce platform serving over 10,000 monthly users, by architecting a scalable backend with Node.js and PostgreSQL deployed on AWS ECS, RDS, and CloudFront.
- Designed and implemented a secure authentication and authorization system using JWT and Role-Based Access Control (RBAC), enabling secure access for 3+ distinct user roles.
- Automated the end-to-end CI/CD pipeline using GitHub Actions and Docker, reducing average deployment time by 50% and improving release frequency and reliability.
- Optimized database queries and API response times, resulting in about 30% improvement in page load speed and overall user experience.
- Mentored 2 junior developers and actively participated in sprint planning, code reviews, and architecture discussions to ensure high code quality and project alignment.

MERN Stack Developer | Ekana Technology Pvt Ltd, Lucknow | July 2022 – July 2023

- Developed a full-stack insurance tracker portal ([UIIB](#)) for US brokers, resulting in a 40% reduction in manual policy tracking effort by automating CSV imports, renewal notifications, and compliance reporting.
- Built key features including a dynamic insurance calculator and reporting dashboard, empowering agents to manage a portfolio of 20,000+ policies efficiently.
- Architected the frontend using Nuxt.js (Vue) and implemented state management to create a seamless, responsive user experience.

- Developed an NFT marketplace from concept to deployment; integrated smart contracts using Hardhat.js and enabled transactions via **Metamask Wallet**.

Projects

HexaHome – Cloud-Based Real Estate Platform | [Live Link](#)

- A scalable property portal featuring advanced search filters, user wishlists, and real-time inquiry forms. Architected the backend with Node.js and PostgreSQL using Prisma ORM, and deployed on AWS infrastructure (ECS, RDS, CloudFront) serving 10,000+ users.

Insurance Tracker Portal (UIIB) | [Live Link](#)

- A comprehensive insurance management system that streamlined broker workflows through bulk CSV policy imports, automated reporting, and real-time tracking, reducing manual effort by 40%.

Dev Portfolio & Collaboration Platform | [Live Link](#)

- A dynamic personal portfolio showcasing advanced frontend skills. Implemented with React.js and complex animations using Framer Motion, featuring a dark/light mode theme toggle, a responsive design, and a functional contact form with email integration via Netlify functions. Serves as a playground for experimenting with new web technologies.

NFT Marketplace

- A decentralized application for minting, listing, and purchasing NFTs. Developed and tested smart contracts with Hardhat.js and integrated a seamless Web3 user experience with Metamask for wallet transactions.

Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3, Python
- **Frontend:** React.js (Proficient), Next.js (Intermediate), Nuxt.js (Vue) (Intermediate), Context API, Redux
- **Backend:** Node.js (Proficient), Express.js (Proficient), FastAPI (Basic), REST APIs
- **Databases:** PostgreSQL (Experienced), MongoDB (Experienced), Prisma ORM, Mongoose ODM
- **Cloud & DevOps:** AWS (ECS, RDS, CloudFront, S3), Docker, CI/CD (GitHub Actions)
- **Blockchain:** Hardhat.js, Smart Contracts, Web3.js, Metamask Integration

- **Tools & Methods:** Agile/Scrum, Jira, Git, JWT, OAuth, Postman

Education

Master of Arts (MA) | Subharti University, Meerut | 2018

Why Shortlist Me?

✓ **Proven Impact:** Delivered a 40% efficiency gain for US insurance brokers by automating policy tracking and reporting.

✓ **End-to-End Ownership:** Takes projects from concept to cloud deployment, exemplified by launching the scalable HexaHome platform on AWS.

✓ **Modern Technical Expertise:** Hands-on with scalable cloud architectures (AWS), modern frontend frameworks (React/Next/Nuxt), and DevOps practices (Docker, CI/CD).

✓ **Problem-Solver:** Focuses on solving real-world business problems, leading to tangible improvements in user engagement and operational workflow.
